WIDE & STYLE

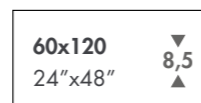

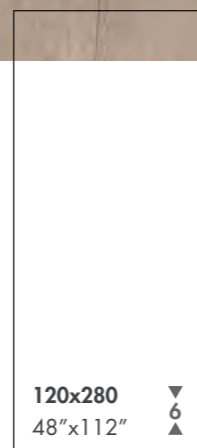

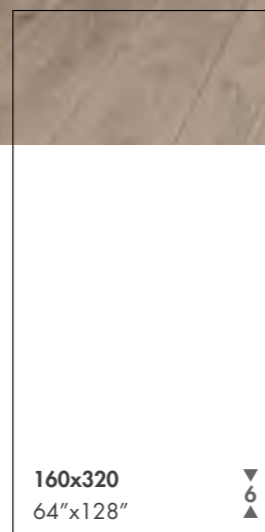

WALLPAPER REIMAGINED

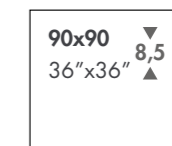

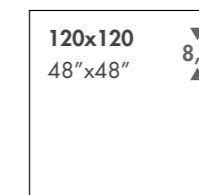

Wall Decor

The prestigious range of large size ceramic slabs produced in sizes up to a record 160x320 cm. While maintaining a constant focus on new trends in interior design, new technology and innovation with the aim of developing aesthetically advanced products using porcelain tile technology. The WIDE&STYLE collection combines excellence in latest-generation production methods (large sizes and digital decoration) with renewed attention to decor in ever new and more diversified forms of expression to bring a distinctive, personal touch to every project.

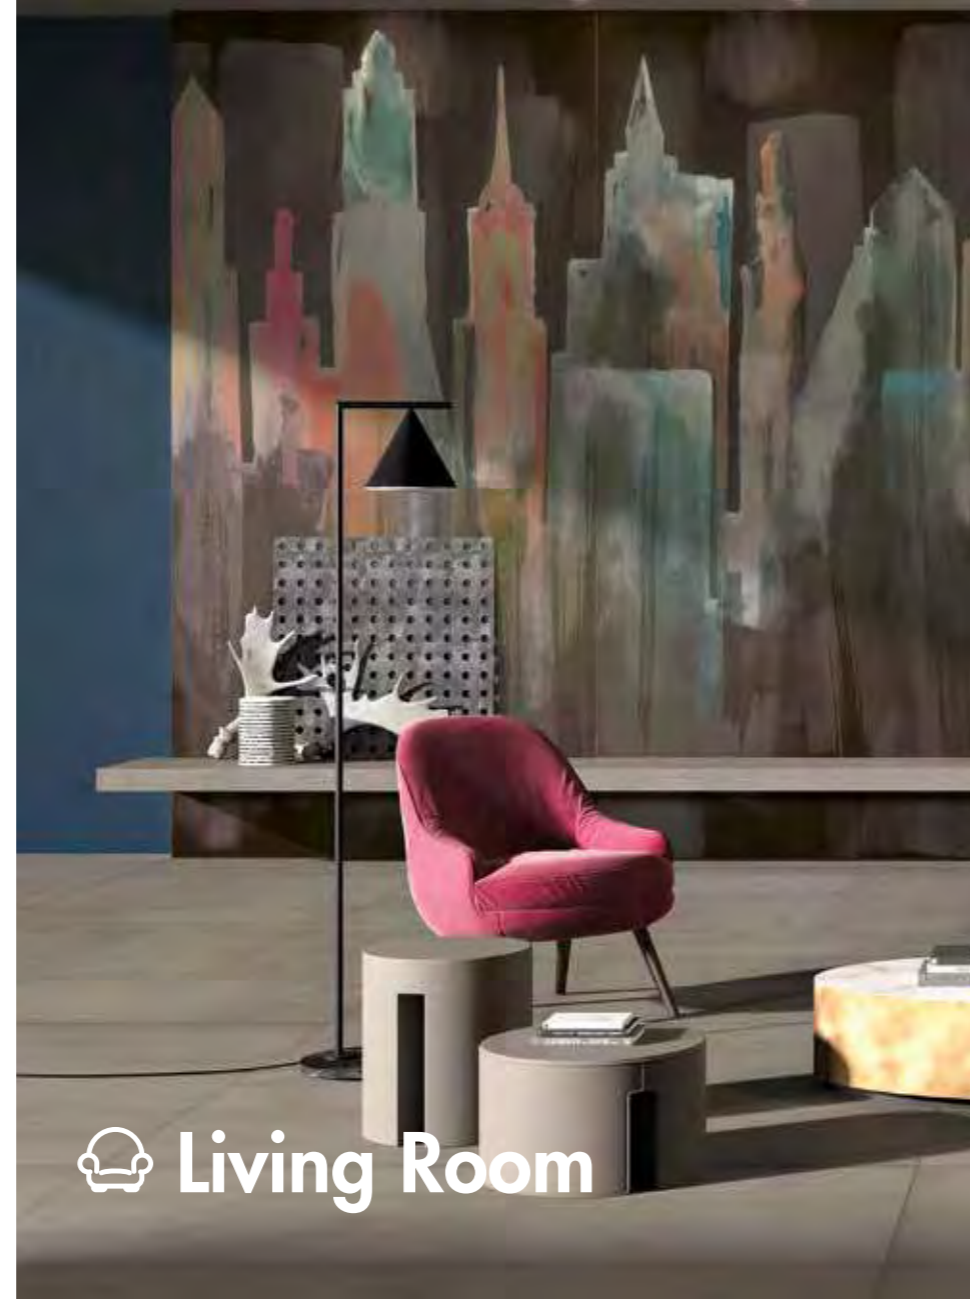

Floor Decor

From Ceramic Wallpaper to Ceramic Rugs. Wide&Style is extending the concept of digital decoration of porcelain surfaces from walls to floors and offering new creative potential for interior design. An original concept based on the decorated floor trend, ceramic rugs are ideal not just for residential interiors but also for collective spaces where high technical performance is essential. Latest-generation digital technologies create bright, intense colours even on tiles fired at very high temperatures that consequently have excellent wear and foot traffic resistance. The aesthetics and patterns specially designed for these decorations compare favourably with those of the world of fabrics, while the unique qualities of porcelain guarantee exceptional levels of hygiene and practicality of use. For this application, Wide&Style opts for a square format in the two sizes 90x90 cm and 120x120 cm.

 **Kitchen**

 **Living Room**

Restaurant 

Everywhere

The large sizes reduce the perception of the grout joints and give free rein to the creativity of architects and interior designers, who can use porcelain slabs in the most diverse applications. WIDE&STYLE can be used on floors and walls in residential spaces (bathrooms, kitchens, living rooms and bedrooms) or can be adopted as a distinctive element in commercial projects (lounge bars, restaurants, shops). It also opens up new opportunities for cladding exterior façades. To expand the potential applications of porcelain, the WIDE&STYLE slabs are available in 3 versions: DIGIT+, produced by high-definition digital printing, combined with a firing process at around 800°C to make the surfaces supremely durable even when subject to the most extreme conditions (thermal shock, chemicals, moisture) and FLOOR DIGIT+, characterized by a vitreous layer capable of protecting the surfaces from prolonged walking exposure.

Outdoor 

 **Retail**

Lounge Bar 

Bathroom 

Customize

To cater for the specific needs of commercial players, extra graphic content such as company logos to be inserted into the WIDE&STYLE collection. For the business design service, the sales price list will be adapted with the addition of the new print mechanicals. The additional costs will be estimated according to the complexity of the graphic design.

Style Utopica

by
D-Segno Studio

Utopica is the new Wide&Style capsule collection that transforms the concept of wallpaper into a metaphysical journey through imaginary volumes, perspectives and architectures, which are reproduced on the ceramic surface in a sophisticated melange of colours. The collection is curated by D-Segno Studio and reflects the multifaceted experience of a young creative team who reinterpret artistic languages in an eclectic blend of graphic designs and styles. D-Segno Studio, based in the heart of the Sassuolo ceramic district, operates in a variety of fields including product design and communication and design services.

Style Nuovi Mondi

by
Officinarkitettura

An astonishing collection of Italian cityscapes reinvented according to the art of illusion. The optical effects and visual experimentations that led to the emergence of the first cinemas in the nineteenth century are recreated against the backdrop of these original views, designed to transcend the two-dimensionality of surfaces and capture the imagination of the people living there.

Style by Officinarkitettura

Using a range of techniques and materials, from ceramics to wallpaper, Officinarkitettura designs the surfaces of any project to create a truly bespoke space for the people living there. The inspirations behind the graphic designs of Officinarkitettura are as diverse as the stories they have to tell. In particular, the Officina Italia Decorì line on a ceramic body is an open project rooted in the history of Italian architecture, reinterpreting its details in a contemporary vein.

M'ama non m'ama Senape - Oro*

Style Say It With Flowers

by
Ilaria.I

Created in 2010 by Ilaria Innocenti, a designer with a passion for surfaces and fabrics, the ilaria.i brand collaborates with various Italian manufacturers to realize decorative objects with strongly contemporary appeal based on a combination of craft techniques, freehand drawings and textures.

The Bouquet and ABC collections of porcelain plates and cups provided the inspiration for a new interior surface covering concept with graceful stylised flower decorations and elegant original lettering, which can be used to personalise the ceramic panels with words and messages.

Al cuor non si comanda Arcobaleno

Customize: letters and numbers

The slabs can be customized with letters, symbols and numbers to be inserted in the blank circles characterizing all the SAY IT WITH FLOWERS textures, creating words or sentences. The coloring of the coordinated alphabet, designed by Ilaria.I, is binded to the color version of the selected slab, as displayed on the catalogue. To benefit from this service it is simply required to request the "on demand" form, fill it out and attach it to the order.
